

## FRK-BP "Showa BPF" fork hydraulic kit

### FRK-BP STEP1

First step to modify the fork hydraulic valves of your fork Showa "BPF" system 41 & 43 mm.

Billed Ergal piston with pre-assembled Compression and

Rebound dedicated shims pack.

Sealing bands with high sliding coefficient.

Specific compression valve spring (as replacement of the original one)

Fork kit supplied with a bottle of specific low viscosity fork fluid for a long high performance (Motorex fork SAE 5W).

### FRK-BP STEP2

Step 2 to modify the fork hydraulic valves of your fork Showa "BPF" system 41 & 43 mm.

Billed Ergal piston with pre-assembled Compression and

Rebound dedicated shims pack.

Sealing bands with high sliding coefficient.

Specific compression valve spring (as replacement of the original one)

Set of linear spring in Cr-Mb alloy Steel with cataphoresis surface treatment, available in different rates, dedicated for the different bike models and the driver weight.

Fork kit supplied with a bottle of specific low viscosity fork fluid for a long high performance (Motorex fork SAE 5W).
